Advantages:

1. Installation of YSDEN-SU40 suction unit does not require any special equipment or assistance, it just needs a city electric power and waste water line.
2. It is designed to facilitate all type of dental treatments such as surgical, implant, orthodontics with its permanent powerful suction ability. Can be easily located next to dental chair, as well as moved to any other place through the wheels freely.
3. The suction motor can work 8-10 hours continuously, inside with electronic thermostat to keep longer service life.
4. The hygienic perforations provide necessary air ventilation, so that the sound and heat level can be minimized during working periods. The mobile suction comes with one high volume evacuation and one saliva ejector, for the saliva ejector, on the suction tip, here with a filter, which prevents big particles from blocking the inner and outer system.
