TECHNICAL DATA SHEET

20-Channel EEG System YSEEG-C20

Channels

20

Functions

Routine EEG/Ambulatory EEG(Holter)/Video EEG

Features

Supports 19 EEG channels plus 1 channel ECG to meet with doctor's clinical requirements;

Low power consumption, capable of supporting up to 72 hours recording with 4 AA batteries;

Use of DC power supply eliminates risk of electric shock to patients and prevents signal interference;

Supports real-time EEG waveform recording and display via Wireless Bluetooth transmission, or dynamic recording with flash memory card capable of storing up to 2GB of EEG data (data storage capability depends fully on memory card used);

Fast data uploading capability: Data stored in flash memory card via dynamic recording can be quickly transmitted to desktop or laptop computer through USB 2.0/USB1.1 interface;

Single electrodes with touch proof connectors that meets international standard, and can be replaced individually if necessary;

Event button on the amplifier enables on-the-spot manual event marking of patient's epilepsy seizure during recording;

Compact design and easy to carry, complete with EEG signal isolation to support maximum patient movement without distortion;

Optional video system for recording, editing and displaying video images synchronously with EEG signals.
