

TECHNICAL DATA SHEET

Andrology Workstation with ED Therapy YSSW3604S

Andrology Workstation with ED Therapy YSSW3604S

1.Application Range

Widely used for diagnoses and treatment for

1)Male sexual dysfunction: Erectile dysfunction, ejaculation obstacles, sexuality barriers, defective ejaculation, minor-penis, delayed puberty of male teenagers, and sexual function degeneration of the middle and old male.

2)Prostate disease: prostatitis,prostatic hyperplasia ,prostate pain syndrome.

2.Apparatus Features

1) Merge today's most advanced male sexual dysfunction diagnosis and treatment technologies

2) The electricity-driven bed that is in conformity with ergonomic principles can freely be adjusted on the basis of clinical need

3) Powerful software control functions, a variety of diagnostic software can be switched flexibly

4) High-definition color camera system can track and record the whole course of treatment

5) Dual high-definition LCD screen, can be switched freely

3.Product functions

1)Diagnostic Function

Electro-physiological nerve examination

Doppler ultrasonic blood examination

Sexual psychological evaluation and diagnosis

Nocturnal penile tumescence recorder (NPT)

2)Therapeutic Functions

Low-frequency electric pulse stimulation

Vacuum negative pressure suction

Pneumatic massage

Water massage

Strong current stimulation

4.Standard Configuration

Main unit

Electricity-driven bed

Monitors

Industrial computer

Doppler probe

NPT recorder

Male sexual dysfunction treatment apparatus
