TECHNICAL DATA SHEET

Intraoral Plate Scanner YSDEN-IPS500

Feature :

This product consists of imaging plate scan unit, power adapter, USB cable, imaging plate, protective cover and HandyDentist dental image management software.

Imaging plate is used to trap and store the teeth radiation energy. The stored energy is stable until scanned with a laser beam, to collect information and convert into digital data, then sent to computer via USB cable.

The unit is powered by power adapter, instead of batteries or any charging system, but need to work with software.

The computer and other external devices(like monitor, printer, etc.) that work with this product are equipped by the user own self. For the suggested computer configuration, please refer to '3.3 Computer Configuration Requirements'

Technical parameters :

Rated voltage
