TECHNICAL DATA SHEET

Smoke evacuator system portable Smoke evacuation system YSESU-X300

Fumus evacuation system Portable Fumus evacuation system YSESU-X300

YSESU-X300 Smoke Vac is easy to operate, and it is easy to replace the filter. The high-efficiency filter element maximizes the running time of the filter under the premise of ensuring user safety. The filter can last for 25 hours. The front LED screen can display suction power, delay time, foot switch usage, high and low gear switching prompts, prompts for on/off status, etc.

Sound insulation and low noise

YSESU-X300 smoke purifier introduces low-noise motor technology and perfectly designed sealing technology. Even in High mode, it is one of the quieter smoke exhaust systems on the market.

In the default operation mode, the YSESU-X300 running sound is only 43 decibels, which is equivalent to the background noise of the library. The system is also quite quiet (65 decibels only) when operating at full load in the High mode, with a suction volume of up to 76 cubic feet per minute (CFM).

Efficient and durable filter

The filter of this machine is made of ultra-large mesh carbon membrane (VLSI) of 0.12 micron ULPA grade carbon powder, and the efficiency can reach 99.9995%, which is 100 times that of the HEPA filter. The external filter is extremely easy to replace!

Filter monitoring function promptly remind relevant personnel to replace the filter to ensure the safety of medical staff

High and low shift button

If necessary, please press the high and low shift key, the operator can quickly increase the suction power.

Three working modes

Auto-sensing mode (synchronize with high-frequency surgical systems of various brands to work together), auto mode and pedal mode

Specification

product name

new generation digital smoke evacuator system

model

YSESU-X300

After-sale Service

Online technical support

Lead time

7-10 working days

Properties

Electrosurgery

Power Source

Electric

MOQ

1 piece
